

Solution Requirements

Team ID	PNT2022TMID28345
Project Name	Estimate The Crop Yield Using Data Analytics

The analysis that we do should be able to:

- Visualize the trends and patterns in the data.
- Understand the patterns that will be visualized in the IBM Cognos Analytics dashboard.
- Provide customers (people engaged in farming) the idea of what may happen if the factors influencing the crop yield has some specific value.
- Determine the value of controllable factors like level of irrigation to the users.
